

# Event Summary

## European Bioenergy Future 2022

Steigenberger Wiltcher Hotel  
Brussels, Belgium

22 - 23 November

### Day 01 - 22 November

10:00 Sustainability & Competitiveness (Working Groups)

12:00 Networking Lunch

#### 14:00 European Bioenergy Future

Opening and Keynote

Panel 1: How to secure biomass procurement despite a challenging EU legislations framework

Panel 2: Bioenergy related negative emissions, a promising market

17:30 Networking Drink

18:00 Side Event: Bioenergy Europe General Assembly

20:00 Gala Dinner

### Day 02 - 23 November

09:00 Pellets & Wood Supply (Working Groups)

11:15 - 15:00 The role of Intermediate Bioenergy Carriers (MUSIC Workshop)

13:00 Networking Lunch

15:00 Fossil Free Future of Energy Intensive Industries (RE4Industry Workshop)

16:30 Closing

# Event Programme

## European Bioenergy Future 2022

DAY 01

22 November

---

09:00 Welcome Coffee

---

10:00 Sustainability & Competitiveness (Working Groups)\*

The joint Working Group meeting will provide an overview of the current situation facing the bioenergy sector, looking at how the sustainability criteria of the Renewable Energy Directive is changing as well as examining the expected impacts of the REPowerEU plan and the consequences Russia's war in Ukraine is having on the industry.

---

12:00 Networking Lunch

---

**14:00 - 17:30 European Bioenergy Future**

---

14:00

**General Chair**

Jean Marc Jossart, Secretary-General, Bioenergy Europe

**Opening**

Hannes Tuohiniitty, President, Bioenergy Europe and Sector Manager, Bioenergia ry

**Keynote Speech**

**Bioenergy Market Dynamics in a Context of Very High Energy Prices**

William Strauss, President, FutureMetrics

---

14:40

**Panel 1: How to secure biomass procurement despite a challenging EU legislations framework**

**Is it going to be more and more challenging to supply biomass in the future?**

With the Fit for 55 package, many European legislations are being reviewed, strengthening the sustainability criteria for bioenergy in view of protecting biodiversity and increasing carbon stocks in forests. The panel will discuss how such legislative changes might impact the future of biomass supply and how forest owners and industries should adapt.

**Moderator:** Daniel Reinemann, Policy Officer, Bioenergy Europe

**Panel**

European Commission (tbc)

Fanny-Pomme Langue, Secretary General, Confederation of European Forest Owners (CEPF)

Thomas Siegmund, Director, Sustainable Resources Verification Scheme (SURE)

Christian Jürgensen, Senior Biomass Specialist, Preferred by Nature

Company using biomass (speaker tbc)

---

# Event Programme

## European Bioenergy Future 2022

DAY 01

22 November

---

15:50

Coffee Break

---

16:20

**Panel 2: Bioenergy related negative emissions, a promising market**

**Is there momentum for investments in biochar and BECCS?**

Reaching carbon neutrality by 2050 is impossible without negative emission technologies. The political framework for bioenergy carbon capture and storage is currently under discussion at a European level. The panel will evaluate the attractiveness of such evolving policies for the biochar and BECCS markets.

**Moderator:** Irene di Padua, Policy Director, Bioenergy Europe

**Panel**

Christian Holzleitner, Directorate-General for Climate Action, European Commission

Anna Dubowik, Secretary General, Negative Emission Platform

Anders Egelrud, CEO, Stockholm Exergi

Mark Preston Aragonès, Carbon Accounting Policy Manager, Bellona Europa

Philippe Haffner, CEO, Haffner Energy

---

17:30

Networking Drink

---

18:00

Side Event: Bioenergy Europe General Assembly (for members only)

---

20:00

Gala Dinner

---

# Event Programme

## European Bioenergy Future 2022

DAY 02

23 November

---

**09:00 Pellets & Wood Supply (Working Groups)\***

The Working Group Pellets & Wood Supply combined meeting will offer the participants a privileged opportunity to network, discuss the solid biomass markets situation but also to learn from biomass market experts. The meeting will focus on residential and industrial wood pellet markets, virgin and also waste wood chips markets but also sawmilling business.

---

**11:00 Coffee Break**

---

**11:15 The Role of Intermediate Bioenergy Carriers (MUSIC Workshop)\*\***

As the pressure for reducing carbon emissions increases, so does the potential of bioenergy to deliver solutions to new sectors and applications. Join us in this exciting event to hear from industry representatives, technology providers and researchers on:

- How intermediate bioenergy carriers such as torrefied biomass and pyrolysis oil can provide solutions for steel industries, transport fuel production and other applications.
- How energy intensive industries (cement, lime, chemicals and other) have already integrated bioenergy in their decarbonization plans and what are the future prospects.

---

**13:00 Networking Lunch**

---

**14:00 The Role of Intermediate Bioenergy Carriers (MUSIC Workshop)\*\* (Continued)**

---

**15:00 Fossil-Free Future of Energy Intensive Industries (RE4Industry Workshop)**

In this workshop, policy makers, industry representatives and trade associations will discuss the potential of renewable solutions such as sustainable bioenergy. Challenges and opportunities will be assessed for their further implementation in energy intensive industries.

---

**16:30 Final Closing**

---

# Participation Fees

European Bioenergy Future 2022

22 - 23 November

	Member	Non-member	Journalist/Policy Maker/Speaker
EBF + Networking Lunch	€ 150	€ 300	Free
Gala Dinner	€ 50	€ 50	Free
Working Groups	Free	Free	Free
MUSIC & RE4Industry Workshops	Free	Free	Free

[REGISTER HERE](#)

*\*The Working Groups can be attended by members of Bioenergy Europe, with observers also welcome.*

*\*\*The workshops are organized by Bioenergy Europe within the framework of the MUSIC ([www.music-h2020.eu](http://www.music-h2020.eu)) and RE4Industry ([www.re4industry.eu](http://www.re4industry.eu)) projects.*

*These projects have received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 857806 and 952936 respectively.*
