the voice of European bioenergy.
Bioenergy Europe, formerly known as the European Biomass Association (AEBIOM), is the voice of the bioenergy sector at EU-level. It aims at developing a sustainable bioenergy market based on fair business conditions.

Bioenergy Europe is a non-profit, Brussels-based international organisation founded in 1990, bringing together more than 40 associations and 90 companies.

Bioenergy is Europe's first source of renewable energy and will be at the core of its future energy mix. An energy transition supported by sustainable bioenergy will empower citizens and industries, creating a smarter energy future for all.
Advocacy

"New frameworks and regulations will have a critical impact on the bioenergy sector as a whole, creating either challenges or opportunities for the industry after 2020. Being at the center of these processes gives strategic advantage to both companies and associations members of Bioenergy Europe."

Nathalie Hemeleers
Policy Director

What we do

- **Monitor EU policies** on renewable energy, sustainability, heating & cooling, agriculture & forestry, biopower, energy efficiency, air emissions, circular economy, etc.;

- **Manage working groups** to stimulate the development of joint positions and action plans;

- **Develop advocacy strategies**, including policy communications, to raise awareness on the benefits different types of bioenergy offer;

- **Engage with all European bioenergy stakeholders** to give the bioenergy industry a common voice.

Your benefits

- **Receive regular updates** on EU policy and regulatory files through weekly news, internal notes, customised briefings, etc.;

- **Engage directly** with key EU stakeholders;

- **Have a stake in the decision-making process** on Bioenergy Europe positions that directly impact your organisation's future;

- **Get advice from the Bioenergy Europe policy team** on your strategic positioning regarding regulatory matters.
Advocating for the interest of the European bioenergy sector in Brussels is our primary mission. In the context of intense legislative activities on post-2020 energy and climate policies, both policy and communication services are mobilised to ensure that the voice of the sector is heard.
Market Intelligence

“Over the past years, the Bioenergy Europe Statistical Report has become a key publication of its kind. It’s a tool that helps the industry, investors and analysts to follow global market trends and make informed decisions.”

Cristina Calderón
Market Intelligence Director

What we do

- Collect & analyse data on the evolution of bioenergy markets and managing information databases;

- Monitor the latest market developments within specialised press and scientific publications;

- Update a database of relevant support schemes, allowing for the deployment of bioenergy projects;

- Commission studies to provide reliable information on the dynamics of European bioenergy to business developers.

Your benefits

- **Free digital copy** of the Bioenergy Europe Statistical Report every year;

- **Access to market intelligence** through Bioenergy Europe's intranet;

- **Exchange directly with bioenergy experts** on market information;

- **Have exclusive visibility among peers** by directly contributing to our publications.
Bioenergy, more than any other renewable, covers a wide range of materials and conversion technologies. Having a bird's-eye view of such dynamics is key for both business and policy stakeholders when making informed decisions.
Technical Expertise

“One of the greatest successes of Bioenergy Europe’s networks remains the establishment of the ENplus® certification for wood pellets. With more than 9.2 million tonnes certified, ENplus® is the leading certification on the market.”

Gilles Gauthier
EPC General Manager

What we do

- Organise working groups, expert meetings and webinars on a wide range of topics including quality, innovation, safety and standards;

- Run the dedicated networks EPC and IBTC, respectively focused on wood pellet and torrefied pellet technologies;

- Manage the ENplus® certification and the development of other bioenergy certifications to ensure high standard products and installations across Europe;

- Take part in and develop European projects and technology platforms.

Your benefits

- Launch, develop task forces and projects on issues that matter to your business;

- Be part of EPC and IBTC to have a say on technical and quality issues of pellets and stay updated on the latest market trends;

- Take active part in our conferences, webinars and workshops organised throughout the year;

- Stay informed on the most interesting opportunities proposed by EU projects and national support schemes.
At Bioenergy Europe, technical expertise is shared throughout our networks, the European Pellet Council (EPC) and the International Biomass Torrefaction Council (IBTC), as well as dedicated working groups, task forces and, of course, the renowned ENplus® pellet quality certification scheme.
Communications

What we do

- Organise communications actions at EU-level in order to raise awareness on bioenergy benefits;
- Manage Bioenergy Europe’s Working Group Communications in order to agree on common narratives;
- Coordinate and host events for the European bioenergy community to facilitate peer exchange;
- Engage actively with the EU press and monitor the reputation of bioenergy across Europe;

Your benefits

- Join our Working Group Communications to get updates and advice on marketing and communication strategies;
- Get priority access to speaking and sponsorship opportunities and discounted tickets to relevant fairs and events;
- Promote your business through our communication channels, including our newsletter (15,000 contacts), websites, Business Corner and social media;
- Be a protagonist of our pan-European communication campaigns.

“Despite being Europe’s first source of renewables, bioenergy remains too often misunderstood. Educating about bioenergy can be achieved only by establishing and maintaining close collaborations among all stakeholders.”

Jean-Baptiste Boucher
Communications Director
Bioenergy Europe is a well-established organisation in Brussels. To be in our membership directory is to be part of an international bioenergy community that brings global visibility to your company, its products and its services.
“All players caring for the future of the sector should engage with us in the promotion of their vision and the defence of their interests at EU-level at such a pivotal time for bioenergy.”

Jean-Marc Jossart
Secretary General
